Development of waste treatment plant claimed

Thiruvananthapuram, Aug 17: Biotech Centre for Development of Biogas Technology and other Non-Conventional Energy sources, a State Government award winner for energy conservation, has claimed to have developed a waste treatment plant producing biogas and biomanure from domestic waste. At a news conference here today, centre director A Saji Das said the live demonstration of the plant's working would be held at the centre's office premises at Vazhuthacaud M P Appan Road here from August 23 to August 26.
